McGILL BEAT MONTREAL BY WIDE MARGIN

Scored 4 to 1; Red Team in Tie For First Place

ST. GERMAIN IS SCORING STAR

Captain Tallied all Four Goals — McMahon and Bazin Played Stellar Hockey — French Defense Weak — Page was Best for U. of Montreal — McGill was Never Headed — Added to Lead in Every Period.

Intercollegiate Hockey Standing

	W.	L.	F.	A.	Pts.
McGill	4	1	13	8	8
Toronto	4	1	19	13	8
Montreal	2	2	15	17	4
Queen's	0	6	16	25	0

By L. S. B. Shapiro

McGill hockey squad drew abreast of Toronto in the intercollegiate race as a result of the redmen's great victory over the University of Montreal sextet at the Forum last night. The score was 4 to 1.

The spotlight now centres on the Varsity-U. of Montreal game at the Arena on Saturday night. A win for Toronto would mean at least a tie in the final standing, while a defeat for the Queen City team would leave McGill at the head of the race. The final game will be played next Thursday at the Arena when McGill meet the Frenchmen.

It was tight hockey all the way, with both teams chary about opening the game. But McGill was never headed. St. Germain's goal three minutes after the start put the red team in the lead and they held it throughout, adding to it in each period.

The Frenchmen outskated the McGill forwards, but they fell down when it came to matching wits and skill with the red men. A very effective red defense blocked their every attempt at scoring, while Bazin handled everything that slipped through in handy fashion. In the final period the latter had plenty of work to do.

Towering head and shoulders above any other man on the ice, Captain Ralph St. Germain, football star and McGill centre, scored all of McGill's four goals and turned in a display seldom witnessed on the Forum ice. St. Germain was superb as he swept around the French defense and placed the rubber behind Beaumont with uncanny accuracy. Four minutes before the finish, St. Germain took the rubber at the blue line and outskated the Montreal forwards, catapulted his way through the French defense and beat Beaumont on a shot from a very difficult angle. The roar that greeted the red light was not so much on account of the addition to McGill's lead, for the game was already assured, but it was a tribute to the great centre. He went off for his first rest immediately after, and received a tremendous ovation, both from the crowd and the occupants of his own bench.

While St. Germain's name appears on the score sheet four times, the efforts of his teammates, especially Roger McMahon and "Bruds" Bazin must be taken into consideration. The opinion around the French camp is that Bazin, and Bazin only, stood between them and victory. The goalie who has starred in every game he has played, excelled himself last night, in stopping the Frenchmen's thrusts and pokes. He was beaten no only one shot and in that he had little chance to save.

McGill's great strength lies undoubtedly in its defense and here McMahon steps into the picture. The veteran defenseman lent his consistency to Adams, who is filling McGerrigle's shoes, and the two kept the speedy Frenchmen out in expert fashion.

Mickles and Bobby Bell started on the wings and worked hard throughout the game, fitting in well with St. Germain. Above all the pair kept their wings well covered, which isn't a very easy job against the speediest team in the intercollegiate union.

That they were defeated by a one-sided score should not detract from the respect the teams hold for the Montreal squad. The Flying Frenchmen outskated McGill at all times, **but they were outmanoeuvered by the** red squad's superior hockey. It is a known fact that the type of play adopted by the Montreal squad does not lend itself readily to a large ice surface like that at the Forum. Page is not so effective on a large surface. At the Arena the phenomenal little

PROGRAM FOR INFORMAL IN UNION TONIGHT

The following is the program for the Informal tonight in the ballroom. The dance is to start at 8.45 p.m. sharp.

1.—Waltz.
2.—Fox Trot.
3.—Fox Trot.
4.—Fox Trot.
5.—Fox Trot.
6.—Fox Trot.
7.—Fox Trot.
8.—Fox Trot.
9.—Fox Trot.
10.—Waltz.
11.—Fox Trot.
12.—Fox Trot.
13.—Fox Trot.
14.—Waltz.

A buffet supper will be served throughout the dance in the Cafeteria.

COAL AND THE ALPS TOPICS OF ADDRESS

Under Auspices of Inst. Scientifique Franco-Canadien

DR. G. DELEPINE

Three Lectures Open to University Members to be Held at Museum

Dr. G. Delepine, Professor of Geology at the University Catholique de Lille, will deliver three illustrated lectures on geological subjects in the lecture room of the Redpath Museum. At 9.00 Monday morning, February 21, the subject will be "Coal". Lantern slides will be used to illustrate its origin. At 12.00 The same day, Dr. Delepine will talk on the "Marine Corboniferous strata of western Europe and the British Isles". At 9.00 Wednesday, morning, February 23, the subject will be the "Alps", with lantern slides to illustrate their origin and subsequent history.

Dr. Delepne is at present engaged in giving a course of lectures in Geology, at the University of Montreal, under the auspices of the Institut Scientifique Franco—Canadien. Through the efforts of this well known society it is intended to bring to Canada the most distinguished French Scientists, thus enabling a new direct interchange of ideas to take place.

Dr. Delepine is at present engaged to the stury of the Carboniferous roots of Europe, and is considered the foremost authority in many of the questions involved in that extensive and important subject. The geological profession is indebted to him for more than sixty important publications in this special field.

These lectures are open to all members of the University.

R.V.C. WON AND LOST GAMES

Fast Basketball Featured Tilt With M.S.P.E.

On Tuesday Feb. 15 at 7.30 p.m. the R. V. C. met M. S. P.E. in basketball result was a victory for the R. V. C. first team—score 37—24 and a loss for their Second team M. S. P. E. winning by a small margin score 46—44.

Both games were fast and interesting to watch.

The scoring especially in the second halves, was alternate and in the second team game the out come of the match was very doubtful.

The line-up:—

1st Team

R. V. C.		M. S. P. E.
	Forwards	
N. McMartin		E. Ball
B. Carter		M. Porter
	Centres	
J. Ross		M. MacGregor
M. Ross		R. Nesbitt
	Guards	
J. Fairbarin		J. Bowers
Glenn Cameron		H. McKean

2nd Team

R. V. C.		M. S. P. E.
	Forwards	
J. Snyder		H. Innis
P. Perry		L. MacKibbon
	Centres	
B. Archdale		K. Duval
B. Ferneyhough		E. Lawrence
	Guards	
D. Ross		D. Moore
E. Peters		M. MacKenzie

ELASTICITY OF STEEL SIMILAR TO THE EARTH

Professor Gillson Describes Internal Structure Of Earth

INFLUENCE OF MOON

Explains How Density of Substances in Planet are Found

A crowded theatre greeted Professor A. H. S. Gillson last evening, when he delivered a lecture on "The Earth", in the Macdonald Physics Building. The lecture was held under the auspices of the Royal Astronomical Society, and was open to the public.

The professor's address dealt with the internal structure of the earth the recent discoveries of scientists.

"If we were to ask what the shape of the earth is," the professor began, "no doubt we would receive the reply that it is a sphere. But if we ask the question how do we know that it is a sphere, the problem is much more difficult to answer."

The ordinary everyday answers to this question, such as seeing ships appear on the horizon, continued Professor Gillson, satisfy the man in the street. A real method, however, is to hang a swinging pendulum and note its position well. Later notice how it has changed its position, swinging now at an angle. This experiment was illustrated by the professor in the following manner: From the ceiling of the hall was suspended a sphere which had a point sticking out, conciding to the axis of the earth. The point always hangs toward the centre of the earth, no matter in what direction the sphere might have been swinging. At the end of the lecture it was distinctly noticeable that the sphere had changed position and was swinging at a different angle. This at the same time proves that the earth is rotating, but its axis remain in the same position.

Professor Gillson then continued by discussion Newton's principles, Gravity; and showed the calculations whereby it had been discovered that the density of the earth is five and a half times that of water. Accordingly the matter inside the earth's surface must be a great deal denser than what we have on the surface; for we know the densities of the substances above the inside layer.

In 1898 a German scientist carved on a number of experiments and found that the density of substances on the outside layer of the earth is 3.2, while the inside layer, which consists of about three-quarters of the earth has a density of 8.2. A model of such a sort is an excellent one to explain many facts and problems, according to Professor Gillson.

Moreover, if we could cut the earth into two sections, slicing it from the centre outward, we would find that all the matter in any one section will have the same weight as another

(Continued on page four.)

MACCABAEANS TO MEET ON SUNDAY

Mohammedanism and Judaism Will be Discussed

The difference between Judaism and Mohammedanism will be discussed both in its historical and philosophical aspects at the meeting of the Maccabaen Circle which takes place in the McGill Union on Sunday afternoon at 3.

The speakers will be Miss Florence Louis R. V. C. '27 and Louis Schwartz Arts '27. The former will read a paper which is to deal with the historical relations while the latter will follow with a discussion to the philosophical and and doctornal differences

Miss Florence Louis has already spoken before the Maccabaean circle and consequently all should be waiting with interest for Sunday's meeting

While the Christian faith and other faiths of the Western world are well-known to nearly all people, yet the majority of the people know little if any at all, of the faiths of the Eastern world. This presentation therefore of the historical and philosophical aspects should prove of considerable interest to all.

This is one of the last meetings of the year as only a few more will be held before the end of the term. Consequently a large attendance is expected.

Sixth Issue Of Review Appears This Morning

The sixth issue of the McGill Fortnightly Review appears this morning and will be ready for distribution at ten thirty. Besides the regular subscribers' list which will be handed out by the janitors in the various buildings, copies will be on sale at the Union, the Arts Building, the Science Building the Biological Building, the Medical Building, Montreal Book Room, and Burton's.

Some of the features of the issue are: an article on Canadian Trade Unions by Allan Latham, formerly an Editor of the Fortnightly Review, a study of Pinero as a dramatist, an article on European Art Galleries by Grace Hart. Poems by A. J. M. Smith and Bernard March are also contained in the issue. Book reviews and editorials, as well as other articles complete the list of contents.

Students are also reminded of the McGill Fortnightly Review contest for original short stories which is now being held. The maximum length for these stories is 3000 words, and the last day they may be submitted is March 5th, the judge being Dr. H. G. Files of the English Department.

NEW DISCOVERIES ON POSITIVE RAYS

Dr. D. A. Keys Lectures at Physics Colloquium

Dr. D. A. Keys outlined "Recent work on Positive Rays", yesterday afternoon at 5.00 in the Macdonald Physics Building, before an audience of interested Physicists. This lecture was the sixteenth special Physics Colloquium which are held every Thursday.

The subject, according to Dr. Keys may be divided into four different sections. The first section includes that work carried on by J. J. Thomson, who was the first in the field. The second section is that work done by Rutherford and later continued by his students. The third is that of Denigexter and later that of Smythe and the fourth is the work of Wien and his school of men at Munich.

Wien and his students have made the most recent and most important discoveries. They worked on principally three things, Dr. Keys asserted. These are: how far a charged positive atom will go and how far an uncharged positive atom will go. Then how long a light is emitted from an atom once it is lighted and how long an excited atom stays excited. Finally what it is which admits spectral lines.

Dr. Keys then proceeded to outline the manner in which Wien's school carried on its experiments and what apparatus was used. There was, he said, only one disadvantage in the apparatus used. This disadvantage was in the apporotus used for the experiment to find out how long a light is emitted from an atom. It was not distinguishable whether the light was instantaneous, after the atom had travelled a short distance, or whether the light had travelled with the atom for a short distance; although Wien claimed that it was G. P. Thomson, however, Dr Keys continued, has proven that the atom remains lighted for the distance it travels.

INTER-COLLEGIATE DEBATE TONIGHT

Meet Toronto Here and Queen's at Kingston

"Resolved that the dictatorship of Mussolini is detrimental to the best interests of Italy," is the subject of the Intercollegiate debate with Toronto to be held tomorrow night in the Moyse Hall at 8.15.

Frank R. Scott B.A., B. Litt and H. Carl Goldenberg will uphold the affirmative for McGill.

Frank R. Scott is a former Rhodes Scholar and has represented McGill before in Intercollegiate debates. The other debater, H. Carl Goldenberg, is also a well-known speaker, having been prominent at the Mock Parliaments.

This same subject will also be debated at Queen's tonight. McGill in this case will be represented by A. W. Boos, Arts '27 and E. M. McCaffrey, Law '29.

EXPELLED FOR STEALING

Madison, Wis. (IP)—The University of Wisconsin has expelled one man from school for taking a reserve book from the reading room of the library.

SHAW BROUGHT SOCIALISM TO HIS FICTION

Unable To Depict Beauty Effectively

MISS J. G. SIME

Lectured on Shaw, Conrad, Moore and Galsworthy Last Evening

That George Bernard Shaw was the first author to bring socialism into literature is, in Miss Sime's opinion, an important feature in this author's work. Again, like H. G. Wells, he adds the political aspect to his writings.

Miss Sime last evening dealt with four authors—George Bernard Shaw, Joseph Conrad, George Moore and John Galsworthy This lecture is one of a series of seven being given by the above lecturer in the Association Hal of the Central Y.M-C.A.

Shaw's writings are found in his novels, plays and pamphlets. His earliest literary attempts at the age of 20 when he had just arrived in London from Dublin— the city of his birth —were confined to writing novels. In this field he was unsuccessful and he then turned to play writing. Meredith who was then a literary critic, rejected Shaw's novels. His pamphlets which he later wrote are in Miss Sime's opinion the best of his time. He has something of Swift's clarity of expression and also the ability to 'throw' a though direct at the reader, who understands the thought with astonishing clearness.

An imperfection which this writer has, in the lecturer's opinion, is the lack of a sense of beauty. He seems unable to visualize objects and depict them in an attractive manner.

Joseph Conrad is a Pole who expresses himself in English and, as Miss Sime states, "we are drawn by seeing our language treated by an outsider." In this connection George Moore who lived 10 years in France, has said, "Though a man can think in another language still he is unable to think perfectly." This in a sense describes the work of Conrad; we are always conscious that the writer is not English.

Conrad, in Miss Sime's opinion, is extremely original and he makes his great contribution to our literature in introducing the foreign element. This foreign element, in the lecturer's opinion, will be an important feature in future writers' work.

"George Moore," the lecturer said, "may live by reason of his autobiography; the most beautiful thing he has done." Into his novels he has put nothing but the product of his brain—there is a lack of emotional feeling. He has one thing in common with Wells; the production of a large number of books. His style, however, is

(Continued on page two.)

MUSICAL COMEDY AT MACDONALD COLLEGE

"The Pirates of Penzance" to be Played by Students

The Macdonald Philharmonic Society is presenting Gilbert and Sullivan's Comic Opera, "The Pirates of Penzance", on Friday and Saturday in the Assembly Hall of Macdonald College, Ste. Anne de Bellevue, this being the third Gilbert and Sullivan opera performed by the Society.

The cast is as follows:

Pirate King, Dr. R. H. Angrove.
Major-General, Dr. B. T. Dickson.
Frederick, Mr. Harold Gillingham.
Samuel, Mr. A. J. Hicks.
Sergeant of Police, Prof. L. G. Helmpel.
Mabel, Miss Grace Armstrong.
Ruth, Mrs. C. B. Powter.
Edith, Miss M. Leighton.
Isabel, Miss Joan Armstrong.
Kate, Miss A. Sangster.

The scenery for the two acts has been painted by Dr. Hickson, assisted by Messrs. Whitehead and Howitt. In addition to Harold Gillingham in the cast, the Society will be supported by an orchestra from Montreal, the whole being under the direction of R. B. Musgrove, F.R.C.O.

The performance begins at 7.30 so that visitors from Montreal and the Lake Shore may catch the 10.26 train home.

Tickets (75 cents) may be ordered of the Treasurer, Dr. J. F. Snell, Macdonald College.

B. Tweedie Now Women's Editor Of McGill Daily

At the meeting of the M.W.S.S. yesterday Betty Green resigned her position as Women's Editor of the Daily; she appointed B. Tweedie as her successor, V. Campbell assistant editor and N. Longworth and M. Girvan, night editors; Miss Green extended her thanks to Miss Craig the retiring assistant, the positioin of recording secretary which is held by the Daily editor was also designed.

Miss M. MacSporran then gave a short talk on the Federation of Canadian University Students. It was pointed out that in the event of this Federation coming officially into existance the Women Students of McGill would have to join independently because there is no joint representative with the men as in other universities. The financial question is said to be the main obstacle to members but the feeling of the meeting when put to the vote was one of approval for the project if some arrangements can be made regarding the money question.

SOCIETE FRANCAISE HEARS TWO DEBATES

"Should a Marriage Bureau be Established at McGill?"

Impromptu debating formed the program at the meeting of the Societe Francaise yesterday afternoon. The subjects were all decidedly light and both the participants and the audience seemed to enjoy them Gales of laughter convulsed the listeners when such subjects were announced as:— "Resolved that we should all be much happier if we were bald" — "Resolved that the chewing of gum ought to be encouraged during lectures" — "Resolved that a marriage bureau should be established at McGill.

The first prize, a pound of chocolates, was won by Miss Huldah Alexander, who persuaded her audience that a marriage bureau ought to be established here. Miss P. Benning was given the second prize for upholding the affirmative of "Resolved that all lectures ought to be given in French one day each week."

The judges, Mme. Furness and Miss Gwen Fielders, performed this function very satisfactorily. They eliminated several contestants because they had too much practice in public speaking, notably Miss I. Scriver and also as in the case of Miss Yvette Levy, whose speech was harming and humorous, because French was her native tongue.

At the end of the meeting tea was served.

LABRADOR TO BE LECTURE SUBJECT

Dr. Harry Paddon, associate of Dr. Grenfell of Labrador fame, is speaking to a special young men's meeting at the Central Y.M.C.A., today at 6.30 p.m. Dr. Paddon has had a very distinguished career as a Medical Doctor in the far north. He is a graduate of Cambridge University—an Englishman—and has spent fifteen years in the North Labrador. He is skilled in Medicine and Surgery—is skipper of his own boat, and is the good friend and adviser of the Eskimo people. Dr. Paddon is an intimate friend of Dr. Grenfell and knows his work of the Grenfell Mission from A to Z. He is an exponent of the possibilities of the North in water power, pulpwood, minerals, reindeer, fish and fur. He holds a brief for the people of the North, and no one knows them better or loves them more.

Dr. Paddon's speech will be on "Labrador". McGill men are cordially invited to hear this interesting speaker.

UNITED CHURCH SHOULD NOT ORDAIN WOMEN

Debate At Erskine Church Won By Negative

CO-OPERATION

R. N. Stewart and Erol Amaron Represented United Theological College

VARSITY ARE VICTORS IN TORONTO DEBATE

(Special to McGill Daily)

By P. Matthams.

Toronto, Feb. 17.—Cliff Park and Robert MacRoberts of Toronto University, successfully defeated the motion, "That women be admitted to the ordained ministry of the United Church of Canada," when that motion was upheld by John Claxton and Don MacVicar, of McGill in Sherbourne United Church here tonight.

The three judges gave their unanimous decision to the negative debaters, but on the vote of the audience the decision was 294-71 in favor of the motion upheld by McGill.

The Montreal team, representing the United Theological College, upholding the negative of the resolution, "That women should be admitted to the ordained ministry of the United Church of Canada", defeated a team from the Knox Victoria College of Toronto. The affirmative was upheld by John Manuel representing Victoria College and J. C. Torrance, B.A., of Knox College Toronto. R. N. Stewart, B.A., and Erol Amaron, B.A. both of Theology '27 were the McGill representatives.

The judges: Rev. Dr. Clark, Hon. Justice Mr. R. A. E. Greenshields, and Prof. Lathams of McGill gave their decision in favour of the Montreal team. A popular vote was taken while the judges were considering. This vote resulted in a victory for the affirmative 164 to 91 but fully seventy-five percent of the voters in this case were women. One lady was even noticed attempting to force her husband to vote for women, but he successfully resisted, whilst many couples were divided in opinion.

John Manuel of Victoria College opened the debate. For the greater part of his speech he gave facts regarding the differences between men and women. He went on to state that the present inequality of rights was caused by the social heritage, the Law of the Strongest. The so called superiority of men is due only to woman having been trained from the beginning.

(Continued on page four.)

RIFLE ASSOCIATION WILL HOLD SHOOT

Every Club Member on One of The Teams

On this Saturday the 19th. at 2 p.m. the indoor rifle association will hold the second inter team shoot.

Every member of the club has been chosen on one of these teams. Two classes of specially designed spoons bearing the McGill crest and the clubs initials are to be given to the member of the first and second ranking teams who made the team i.e, the first five on at least three of the four competitions.

The first, held a couple of weeks ago showed lots of enthusiasm and many surprises. Patton's men were sitting pretty on top of the heap until the dramatic entrance of sergeant W. H. Moore's "Iron Man," D. MacRae, who Casually turned in a Possible.

Thirteen points divide the first two teams and team number three is down by the same ominous number; but Pope has his old reliable E. C. Jacques, back from Ottawa and promises fireworks.

Scores have been continually going up. Now the boys chalk up a 95 with the same ease that they did 80 in the Fall. Some have been going down and one sharpshooter who scores as consistent possible made a fine eighty-four last week. But they don't even stop with a possible any more for last Saturday Nation found himself with a record of one hundred and five.

Everyone is making a special effort to be out on Saturday to uphold the honor of the right team.

Lipstick and Ladies

IT is becoming more and more evident that there is a reaction against the painted face. It is decidedly a masculine reaction; men are as weary of the standardized mouth as they are of the standarized female eye brow and the standardized feminine crop. They sigh for a glimpse of natural cheeks, natural eyebrows and natural lips. After all there seems to be no reason why a girl should not look natural as well as act natural; the one is as important as the other. There should be a law on the statute book prohibiting any further use of the permanent wave that makes any and every woman look like a waxwork hairdresser's dummy; even the sight of the old-fashioned school-girl pigtail would relieve the monotony of the feminine landscape; and a plump maiden would exhilarate the eye that is sated by an eternal procession of underfed skeletons.

In these days of hourly divorces, one wonders whether more sympathy should be extended mere man in view of the camouflage, amounting to deception at times, that is practiced by the modern girl. And why is it that this same mere man can maintain his Appolo-like appearance without resorting to the inventions of chemists and beauty doctors? Cosmetics are a diabolical concoction, to say the least; like anything, all right in its place, which place is the world of the theatre, and nowhere else.

If girls are here to be educated, and being educated means gaining a little sense both in the social sphere of life as well as in the academic, then we should expect that, in the near future, this awful stuff lipstick and kindred stuff will be conspicuous by its absense on the fair faces of our fair co-eds. Somebody has got to start it—there seems to be little reason why McGill co-eds should not start being sensible before others show the way.

By the way, there's an Informal this evening.

Superstition

DO you remeber in our Latin books at high school the picture of Laocoon and his sons with the two serpents twining around them, crushing the life from them? Laocoon was a priest of Apollo who, in the Trojan war, was apposed to the admission of the wooden horse into the city. For this, as a punishment, two enormous serpents were sent to attack him, which they did while, accompanied by his two sons, he was offering a sacrifice to Neptune. The serpents coiled around himself and his sons and crushed them to death.

There is another type of serpent in this world, just as deadly, just as poisonous, as that serpent which crushed the life out of Laocoon and his sons, the serpent of superstition. And the serpent of superstition is still crushing the lives out of many persons and stifling in its poisonous folds the development of many peoples.

You need not hurry in killing a snake. There is no fear in his heart, only hatred and contempt as its two legged enemy approaches to avenge, once more, that unpleasant, costly incident in the Garden of Eden. It does not run away from you and when you break its back it is too late, it can only squirm.

So with superstition, it does not fear as science and truth and knowledge advances to kill it, for superstition does not believe that it can be killed. The grand Llama of Thibet makes his subjects, enslaved by superstition, pay tribute to him, keeping him and his army of satellites in idleness. He tells them he is the son of God. The devils obey his orders and the Ruler of the Universe rewards those that he blesses and punishes those he curses. But travellers occasionally enter Thibet bringing science and truth and knowledge, and superstition receives a body blow, weakening still more, the grasp of its coils on the minds of the Thibettans. Followers and worshippers of the Grand Llama observe with amazement that their Llama must obey the orders of some foreign power with soldiers and machine guns.

Mohammed performs miracles for his followers, so they say. The good Mohammedan is bound to win and the Riffs expected to see their prophet perform miracles for them in the war with the French. But the French showed the Riffs a few "miracles" in the shape of airplanes and bombs and Mohammed appeared to be rather backward in coming to the aid of his people. And the old serpent superstition is not as powerful among the Riffs as he used to be.

So it is everywhere. The stones of scientific truth and fact are breaking the back of the serpent but he still hisses, not realizing that his death knell was sounded when printing was invented. The powerful cruelty is gone. Superstition no longer makes laws or applies them, you can no longer be imprisoned or tortured because you do not believe as some other person believes. But he is far from dead yet and a great many more blows must be struck before the old serpent releases his crushing hold on the minds of three quarters of the world.

Varsity Objects

WE reproduce below an editorial comment from the 'Varsity apparently objecting to McGill's claim to the prominence of being the first college in the Dominion to stage a standard comic opera. There are two ways in which any production may be presented to the public—pretentiously or otherwise; the Choral Society of McGill University perhaps still has the lead in the respect that, though it may not have been the first to have entered into the field of comic opera, it has evidently been the first to stage such on a considerably large scale, for amateur theatricals.

"In a recent issue of the McGill Daily we observe an advertisement for the production, by the Choral Society of McGill, of German's opera "Tom Jones." It is referred to as "the first comic opera to be produced by the Choral Society of any Canadian University." In view of the production, by the Victoria College Music Club, of "The Mikado" last year and "Patience" this year, the statement is interesting.

At the same time, we desire to congratulate McGill on their ambition in attempting such a presentation. We are glad to hear that it was highly successful. We are interested, moreover, to see that on January 13th and 14th the University of Alberta presented Wallace's celebrated light opera "Maritana." This interest in light opera seems to be a sign of the times, and it is a very hopeful one. McGill's participation in the movement is not less praiseworthy on account of the fact that they were not the leaders in it."

Correspondence

The sentiments expressed in letters published by this column are those of the writers not necessarily of the editors. Signed communications from anyone interested in the welfare of McGill University will be printed. Anonymity will be preserved when requested, but the writer's name and address must be attached as a mark of good faith.

Correspondents will please write legibly and use one side of the paper only. If you would be pungent, be brief.

* * *

The Editor,
McGill Daily,

Dear Sir:- The McGill Daily, judging from trash inserted on Page two each Wednesday and Saturday, is certainly on downward trend. I am not referring to the Editorial or to short attempts at humour whch usually appear either upside down or only in part, but to the huge columns of "junk" nothing more under the headings of the "Goose Step" and the "Duck Waddle". The general opinion about this University is that those in the Daily office are merely showing the capacity of their minds, but why display it in the oldest and best college daily in Canada?

Can you imagine the thoughts of a full grown mind, of another University, reading such "piffle"? Not so bad if it appeared in the McGill Martlet but,—Think it over Mr. Editor.

Yours for a better "Daily".
F.E.W.

* * *

The Editor,
McGill Daily,

Dear Sir:- May I respectfully suggest that announcements destined for the Daily's column of "Notices" be signed by the writer? This might possibly remove the "repetition fault" as witnessed during the past week.

Yours truly,
M. M. BISSON

* * *

Editor-in-Chief,
McGill Daily.

Dear Sir,—We regret that consideration for their bellies prevented certain members of the "Daily" staff from showing elementary courtesy to a distinguished visitor, and an authority on the Chinese situation, who gave a very enlightened address before one of the leading Undergraduate societies at McGill, last Tuesday night.

Yours sincerely,
COMMERCE '29.

Feted by the Governor of the State, the Mayor and many other prominent people of Columbus, Ohio, has been the experience of Sam Glode, Micmac guide of the Milford Camp in Nova Scotia, who arrived at the Windsor Station, Montreal, recently, on his return from a two weeks visit to Columbus, where he attended the convention and banquet of the League of Ohio Sportsmen. Glode is noted throughout the woods of Nova Scotia for his uncanny ability at moose calling, addressed the gathering of over 1,500 sportsmen on Canadian hunting facilities, particularly in reference to Nova Scotia

O! My! My! How Times Change

THE older generation are fond of telling we younger generation how times do change and that young people didn't act like that when they were girls and boys. There is a dance tonight in the Union. Almost twenty-one years ago there was a dance in the Science Building. Get the setting? Tonight—the younger generation in the Union: twenty-one years ago—the older generation in the Science Building. The following is an episode which happened in the Science building twenty-one years ago as reported in the McGill Outlook of Oct. 8, 1906 My! My! How times do change!

THOSE GIRLS

(Note—Freshmen please do not read this!)

Scene—Engineering Building.
Time—12.30 p.m. Theatre Night.

She (coming out of the ball-room)—"It's too hot and crowded to dance; lets sit this out if you don't mind.'

He—"Delighted; though, of course to dance with you would be pleasant anywhere."

She—"What nice things you say Mr. Green. But I don't believe you really mean them.'

He "Upon my word of honor I mean every word I say."

She—"Truly?"

He—"Truly!"

She—"How nice! But where are you taking me?"

He—"To a place to sit out. Here's the room."

She—(Looking in)—"Why it's quite dark! (A cough is heard inside). "Horrid! Don't let's go in." (They move on.)

She —"This is darker than the other one; I can't see a thing. I won't go in.'

He—"Please!"

She—"Why" What do you want to sit in the dark for?"

He—"Er—the fact is my eyes have been troubling me more or less all evening, and I'd like awfully to rest them.'

She—"You poor man! Well, it doesn't seem proper, but I'll do it for your your sake.'

He—"Thanks, awfully."

(They go in and sit on a table which they run against in the dark.)

(by-and-by)

She—"I'm not a bit comfy."

He—"Is that any better?"

She—"Ye-es, but I don'nt believe that I ought to let you."

He—"Why not?"

She—"You won't think so much of me afterwards, I'm sure."

He—"Pon my word I will—all the more."

She—"Truly?"

He—"Truly!"

She—"Do you know, you bad boy, I believe that was why you wanted to come here."

He—"No, it wasn't."

She—(A little disappointed)—'No-o? What was—"

He (A minute later)—"That".

She—"Oh, you horrid thing! How dare you! I don't care how strong the temptation was, you had no right to presume that way. Did you think I looked like the sort of girl who enjoys being kissed by every man she meets?"

He (Bitterly)—"Not I" I knew you would cut me for it, but for the time being I didn't care—and after all you can't take the memory away form me. I've got that anyway."

She—"I don't think you are a bit polite—you don't seem to care whether I cut you or not."

He—"Don't I though! If you only knew—but what's the use?"

She—"Well, if you're sure you thought I'd cut you I'll—I'll forgive you only it must never happen again."

He (dejectedly)—"Never"?)

She (wavering)—"No."

She (A minute later—rising to go —"Jack, dear, you've mussed my hair horribly. I'll have to go and fix it. But if you tell a soul—"

He (majestically)—"You can trust me."

—Curtain—

BROUGHT SOCIALISM TO HIS FICTION

(Continued from page one)

rather complicated, the movement of which was likened to that of a meandering river, winding about as in a maze.

This author does produce several powerful thoughts, one of which, "It is not width in art that matters, but depth," was commented upon by Miss Sime. This depth, the lecturer considers, is very often lacking in our modern day writers.

"Galsworthy brought a new thing into fiction—the hunanitarian spirit.'

Miss Sime regards him as a fine novelist, not a great one. He is, in his observations, very accurate but he does not treat his subject matter with sufficient heat. He has, in the lecturer's opinion, depicted English society as accurately as it can be depicted. 'Forsyte Saga,' one this author's creation, is, in Miss Sime's opinion, as widely read today as any other novel.

ELASTICITY OF STEEL SIMILAR TO THE EARTH

(Continued from page one)

equal section. At the same time, said the Professor, mountains and oceans have no effect on this principal, for if it did then the sections would not weigh alike and consequently the waters would pile on the mountains by force of attraction.

We know that the moon has a certain attraction on the waters of the earth, causing tides. It occurred to Kelvin, the scientist that one might use the height of the tides to calculate the rigidity of the earth. Through his calculations and those of another scientist they found that the earth is an elastic body with about the same elasticity as steel.

Professor Gilison told also of the experiments conducted by the well-known astronomer Michaelson, who with a friend placed a long pipe with water in an observatory and actually succeeded in measuring the effect of the moon on tides. This experiment was continued for a number of months and measurements were taken every two hours. The final result showed that the water in the pipe was effected to one twentieth of an inch.

Mathematics had worked out long ago that in an elestic body there are two waves. These are the Primary and Secondary waves, commonly known as the P. and S. Through various experiments, it was found that the P. wave has a greater velocity and that it depends on the rigidity and density of the earth. It was then explained by the Professor that when we have an earthquake, we have what is known as the P. wave; this is followed by the S. wave.

Last year an attempt was made by a Cambridge mathematician to revise the whole scheme. He picked out a place where an earthquake took place, then went to a distance of about 101 degrees from there. Primary waves were reported there, but no secondary wave. This meant that something was happening in the earth; something which cut out the S. waves. This had to do with the rigidity of the earth, for the S wave depends wholly on this. From this date and through calculation it was shown that the density of the outer layer of the earth was 4.4 while the inside was 12 times that of water. "Finally, said Professor Gillson, "the earth is a large metallic solid, surrounded by a shell of the elasticity of steel, with a density of 4.4."

At one time the moon is believed to have been part of the earth and it still has a decided effect on the surface of the earth. Altrough the earth is the second smallest planet in the Universe, the moon is the second smallest satellite. The motion of the moon has been a problem to astronomers for a long time and it is only lately that any headway has been made in that direction.

According to recent discoveries continued Professor Gillson, in about fifty thousand million years the day will be forty-seven rours long and the moon and earth will be going round in their respective orbits at the same rate. At the same time, due to the sun's effect as well as the moon's it will come closer to the earth to twice the circumference of the earth.

Professor Gillson then concluded his address by reading a poem on the moon.

The Almighty Dollar

You are not so handsome
To gaze upon—just a dirty dollar bill.

You are but one of many—
Yet in you—I see as in
A crystal globe—darkly—
Face to face—Life and I meet.

In the hands of some you are a blessing.
In other hands—A curse and detriment.
Those who have you—I can see them,
Their lives written across your blank, expressionless Face.
They spend you for life and reap it's sorrows and joys.

And dimly I can see as a reflection
Outstanding hands seeking you,
Bowing down to you—Almighty God of Desire.
Behind these hands I see the lurking shadows of Lust, wanton craving, sorrow.

Why are you so necessary?
Why can I see in you the open Book of Life?
It's dark and bright pages in your face.
Is it because you are Really almighty?
Were you created with the world?
Were you made in six days and six nights.
Yes in days of desire and nights of Lust.
Were you once a loose nebluos now grown compact?
Your conceit! You are but the proof of man's inadequacy.
And on you God smiles.

College Tours To EUROPE

$385 for 37 days
$260 for 23 days

Sailings every few days during June, July and August

Join the "ocean house-party" of fraternity brothers and lovely co-eds who are going to Europe this summer.

What a glorious vacation! Two weeks aboard ship in a campus-like atmosphere of good fellowship. Dancing on deck to the music of a college orchestra. Parties and masquerades. Deck sports. Something doing every minute! With the jolliest crowd of men and girls you ever met.

Practically three weeks in England, Holland, Belgium and France on the $385. tour—a week in either London or Paris on the $260 tour.

Extension tours to Ireland, Scotland, Switzerland, Italy, Germany at same moderate prices.

Don't miss the time of your life. Make arrangements now. Mr. G. M. Hyde at the McGill Union will gladly give you full particulars of the College Tours, or telephone UPtown 3688.

Always carry, Canadian Pacific Express Company's Travellers Cheques. Negotiable everywhere.

VARSITY OARSMEN PRACTISE DAILY SEVENTY STRONG

Blue And White Making Big Bid To Get To 1927 Olympics

EIGHT MACHINES

Squad of 150 Has Been Cut to 35 Seniors Under Coach Lowden

(From the Varsity)

"You have a chance of going to the Olympic games on Varsity rowing crews" is the enticing statement of a huge red-lettered poster in Hart House This call was answered by no less than 100 men at the beginning of the season, increasing to 150. This number has been reduced to about 70, 35 turning out for senior and the same number for the junior crew. According to the honorary coach, Professor "Tommy" Loudon, this number will be greatly reduced when the ice leaves the bay and the crews take to water.

At present Varsity Rowing Club has eight modern rowing machines which are used daily from five to six p.m. by the rowing aspirants, four racing shells and two training shells.

The Varsity Rowing Club was founded in 1897 by a group of rowing enthusiasts, prominent among whom were Dr. Bruce McDonald and W. Douglas. The world-famous Ned Hanlan was its first coach.

Through the efforts of Professor Loudon the senior eight-oar crew won the Hanlan memorial trophy, emblematic of the senior championship of Canada, in 1920. This was repeated for the succeeding three years. In 1920 and 1921 the Senior Championship was won by a Varsity crew, and in 1921, Varsity won the Intermediate championship at the American National Regatta. The culmination of Professor Loudon's efforts produced in 1924, a Varsity crew which represented Canada at the Olympics. This crew in the senior eight-oar event came second to Yale, giving backwash to crews from such formidable nations as England, Australia, Argentine, Belgium, France and Spain.

It's up to the whole student body to get behind him and see that he gets a square deal in 1927. And the way to do it is very simple. Simply make the Rowing Club carnival on Thursday night a success. It is to be held in the new Varsity Arena, and every student should turn out, and give the club and financial support it so urgently needs. The Rowing Club isn't asking for charity, merely support. The show at the Arena will be well worth the price of admission, with basketball and baseball played on skates, figure skating, speed skating, barrel jumping and two hours' dancing. What more do you want?

The students came nobly to the rescue in 1923 when they contributed over eleven hundred dollars to buy a shell for use at the Olympic games. That money was raised by direct canvass. All you got for your money then was the consciousness of supporting a worthy object. You've still got that consciousness this year, and, in addition, you get your money's worth in entertainment. Full details of the programme will be given in tomorrow's "Varsity".

ARTS BASEBALL NINE DEFEATED COMMERCE

Scored 20 to 7 Victory in Easy Fashion

The Arts faculty baseball team downed the Commerce nine last night in the High gym to the tune of 20 to 7 Both squads displayed good batting and fielding but Arts had a decided edge in running bases. The Commercials are unfortunate in the fact that they lacked a pitcher although Budden played his best. Senzilit, Zimand and Held showed up well for Arts while Consiglio and Wallek were outstanding for Commerce.

The line-up.—

ARTS (20)	COMMERCE (7)
Pitcher	
Zimand	Budden
Catcher	
Musselman	Consiglio
First Base	
Held	Cudlip
Second Base	
Leithman	Robbins
Third Base	
Miller	Lauer
Short Stop	
Issenman	Wallek
Left Field	
Blonde	Wight
Centre Field	
Yellin	Maughan
Right Field	
Sezelit	Smith
Sub	
Laing	Levinson

She (at county fair)—"Look at the people. Aren't they numerous?"

He—"Yes, and ain't there a lot of them?"—Ex.

McGILL GOALIE

"Brubs" Bazin who had much to do with McGill's victory last night.

TRIP TO SHERBROOKE WAS VERY ENJOYABLE

Basketball Team Entertained in Royal Manner by Hosts

SPORTSMANLIKE GAME

McGill Players Were Guests of Sherbrooke Snow Shoe Club and "Y"

McGill senior basketball team arrived in Montreal yesterday morning from Sherbrooke after perhaps the most enjoyable trip that a red and white cage team has ever had. From the moment of their arrival in the Eastern Townships centre until the time the train pulled out early Thursday morning the McGill team were entertained in a royal manner by the Sherbrooke Y. M.C.A. members and basketball team and by the Sherbrooke Snow Shoe Club.

On its arrival at Sherbrooke at 3.10 Wednesday afternoon the McGill party was met by members of the Y.M.C.A. and driven in their cars to the local headquarters. Here the boys left their travelling bags and then had about two hours at their disposal to look over the city before assembling for the supper that the Wisemen had prepared for their guests.

Shortly after six o'clock the McGill visitors together with members of the Sherbrooke team and a few friends sat down to a supper which proved to be one of the finest meals they had ever eaten. Several local young ladies saw to it that nobody lacked anything and together with Mr. McVie of the Y, who was the host, succeeded in placing the visitors completely at their ease.

Soon after the conclusion of the supper festivities the red and white quintette dressed for the game which was played in the 53rd Armory on a floor that is easily the equal of the Montreal High School gymnasium, before a rather slim crowd of one hundred and fifty people. The game was clean throughout and it is doubtful if more sportsmanlike opponents could be found anywhere.

Following the game, the outcome of which is now well-known, the redmen hurriedly dressed and were bundled into a sleigh for a drive to The Club House of the Sherbrooke Snow Shoe Club. Mild weather and a perfect night was conducive to much mirth and merriment and to use the old hackneyed expression "a good time was had by all" both on the way out and on the return trip. Mr. McVie proved to be the main target of the buffoonery but he usually succeeded in turning the tables on his tormenters with a witty reply that set the sleigh rocking with laughter.

The McGill team announced their arrival at the Club House with the college yell and then began the finest time that the members of the red team have ever experienced while on a basketball trip. Following a sumptuous repast the president of the club called the meeting to order and after the business had been dealt with welcomed the McGill squad on behalf of the club. Speeches by Coach Van Wagner, Mr. A. W. Seaman, Errol Amaron and several others were interspersed with entertainment in the form of songs by members of the Sherbrooke organization. All the speakers took occasion to laud the sportsmanlike way in which the contest had been played and splendid spirit was manifest on all sides.

The various songs went over "big" with the audience and several of the songsters were encored three times before being allowed to sit down. One of the singers, a past president of the club, scored the hit of the evening when he composed a verse about the McGill quintette on the spur of the moment to the tune of a catchy air entitled, "Say It Again". The verse ran something like this:

"I went down to the Armory tonight
It almost made me ill
To see how the Sherbrooke boys
Were trimmed by Old McGill".

The Sherbrooke Snow Shoe Club is celebrating this year its golden anniversary, having been in existence for fifty years. At Wednesday's meeting the honorary president, Mr. W. A. Hale was in the chair and the enthusiasm evinced by all present demonstrated beyond a doubt the healthy condition of club affairs. Their Club House is a mighty fine building and quickly took the fancy of every one of the McGill guests. The Motto on the wall, which ran as follows, seemed to be particularly appropriate:-

"As a bird is known by his notes
So is a man known by his language".

No article on this subject would be complete without special mention of Mr. McVie, the genial Scotchman and Y secretary, who organized and arranged for the visit of the McGill senior intercollegiate basketball team to Sherbrooke. He deserves the lion's share of the credit for the smooth way things were run off and the McGill basketball team owes much to him for a very pleasant afternoon and evening.

CARL VOSS TURNED PRO WITH ST. PAT'S

Toronto, Ont. Feb. 17.—(Special to McGill Daily) — Carl Voss made entry into professional sports tonight when he appeared in a St. Pat's uniform against New York Americans in a N.H.L. fixture. Voss jumped from junior amateur hockey to pro ranks in one grand leap, having figured on the line up of the Toronto Marlboros since his exodus from Queen University earlier in the winter.

HIGH SCORER

Ralph St. Germain, Captain of the McGill squad, who scored four goals last night.

BEMOAN PROFESSIONALISM

Harvard Crimson Comments on Young, Ederle and Grange

The Harvard Crimson, while commenting on George Young's channel swim takes occasion to moan over the state of present day athletics. Under caption, "The Plague of Professionalism", the Crimson says:—

"George Young has conquered the Catalina channel and as a result found himself the most talked of persons in America. Gertrude Ederle, a few months ago found herself in a similar position. Red Grange and how many others have found that because of unusual athletic ability they are able to command salaries that would seem fabulous to a college professor and are not equaled by the majority of capable and efficient business men. We aren't belittling their achievements which are without doubt the result of hard work and ability, but it does seem to be evidence of an unhealthy attitude on the part of the American public. An interest in Athletics is natural and desirable but when commercialized to the present extent it loses something fundamental. Cities and towns maintain representative athletic teams for advertising purposes, spectators attend to wager on the outcome and players play for material gain. Sport has ceased to be sport; it has become an industry with managers, capitalists publicity agents official publications and all the other features of any big business enterprise.

"Many an amateur athlete is so only in name. He prefers huge expense accounts to a salary. West Virginia Wesleyan was forced to curtail football because it was learned that players there were receiving financial inducement to represent her on the gridiron. And now it is proposed that Lawrence High School should reward [illegible] athletes with scholarships.

WINTER SPORTS TO BE RUN OFF HERE

March 4th and 5th are Dates of Intercollegiate Meet

U.S. REPRESENTED

Five American Colleges to Compete Including Dartmouth and New Hampshire

The championship meet of the Intercollegiate Winter Sports Union will be held in Montreal on Friday and Saturday March. 4th and 5th. The United States promises to be well represented at this meet as Dartmouth, New Hampshire, Williams, Bates and Bowdoin colleges are all sending representatives to compete in the various events.

McGill will be ably represented in the fancy skating by Dick Bolton and Lloyd Johnson; the fancy skating competition will take place on Friday evening March 4th at the Winter Club. The McGill men for the snowshoeing and speedskating events have not been picked yet; practices in both these sports are being frequently held and anyone desiring to turn out for snowshoeing is asked to get in touch with Malcolm McNauton.

The skiing tests and jumping competition are of the greatest importance as America's best jumpers will be entered, Charles Proctor and Ernest Pederson, who came first and second respectively in the Dartmouth meet, are both likely candidates for the United States Olympic team and will be in action here. Proctor has been the Intercollegiate skiing champion for two years running and Pederson is champion of the Eastern United States. McGill's team for this event will probably be picked from the following men:- Sterling Maxwell, W. Ball, Ted Johnson, Jim Martin and W. B. Thompson. The ski jumping competition will be held at the Montreal Ski Club hill on Cote des Neiges road on Saturday afternoon at 2.30 o'clock. The seven mile cross country ski race will be held Saturday morning at ten o'clock and the poficiency tests and 1 mile downhill race at two o'clock.

(The following is a schedule of the events:-

Friday March 4th

2 mile snowshoe race.

7.30 p.m. speed skating, 440 yards and 2 mile M.A.A.A.

8.00 p.m. Fancy skating at the Winter Club.

Saturday, March 5th

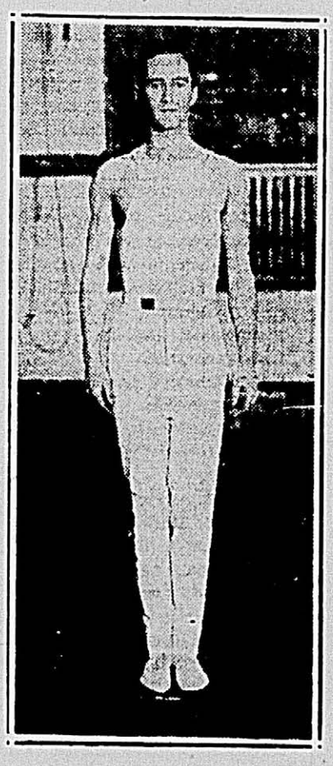
10 a.m. 7 mile cross country ski race.

2 p.m. Ski proficiency tests. 1 mile downhill ski race.

2.30 p.m. Ski jumping.

"Professionalism has invaded the last stronghold of amateur athletics, the schools and colleges, although there still seems to be a feeling that appearances must be maintained at any cost. Evasions and technicalities are used to get around the spirit of the amateur rule. If the public permits them it tacitly gives the consent to professionalism and opens the way for its active sponsors.

GYM CAPTAIN



Ray Caron, who will lead his McGill gymnasts against Varsity tomorrow night at the Queen City.

SWIMMING MEET AT TORONTO TONIGHT

McGill Mermen Will Try to Regain Title From Varsity

PROGRAM ISSUED

Bourne and Clarholm in Speed Events; Gibbons Will Defend His Swimming Title

(By the Natatory Nymph)

Tonight the McGill swimming team at Toronto will try to regain the honors which they lost last year. They have spent the last day or so in resting, except for a workout in Hart House tank last night, just to get their sea legs so to speak. Coach Vernot reports that the team is in as good a condition as he has seen any of the ones which he has trained for McGill. McGill is putting all her energy into the individual events rather, leaving the relay alone as the points compared with the others are small.

Bourne and Clarholm are the pair which will carry the red colors in the three speed events namely 50 yds., 100 yds. and 200 yds. free style. The Toronto men will certainly [illegible] to be very good if they count on any chance of beating them. Gibbons will be the old reliable in the diving and should be good for first place. Forsyth is back again on the team and has been plunging well into the region of 70 feet, and it is probable that Goddard will be the second string. The back stroke will be left to Barr and Legge, both of whom are new men to McGill this year, while the breast stroke points will have to be earned by both Brabander and Marcou.

The following is the prabable line up for the program tonight:

Relay Race — Gibbons, Ross Barr, Marcou.

50 yds. Free Style — Clarholm, Bourne.

Fancy Diving — Gibbons.

50 yds. Back Stroke — Barr, Legge.

100 yds. Breat Stroke — Brabander, Marcou.

100 yds. Free Style — Bourne, Clarholm.

Long Plunge — Foysyth, Clarholm, Goddard.

200 yds. Free Style — Bourne, Clarholm, Matthams.

Well over two hundred members of snowshoe clubs in Montreal, and other centres in Quebec, left over the Canadian Pacific lines recently to attend the annual conventions of the Canadian and U.S. Snowshoe Unions at Manchester, N.H.

McGILL BEAT MONTREAL BY WIDE MARGIN

(Continued from page one.)

centre is at home, his long stick preventing a man from skating around him without running into one of the forwards.

Nevertheless, Page's poke-check was in evidence almost every minute of the game. He was slowed up a little when he bumped his head on the ice in a fall. Lafrance showed himself to be the speediest man on the ice, but his far famed scoring abilities failed to materialize. Beaumont played fair hockey in the nets, St. Germain giving him little chance to save.

McGill came into the lead three minutes after the start when Beaumont poked the rubber into his own nets in an attempt to clear St. Germain's rebound. At the time, McGill was a man down. There was no scoring during the remainder of the period.

The next goal shortly after the beginning of the second was the prettiest hockey of the evening. St. Germain, Mickles and Adams went down the ice, the latter two drew the attention of the French defense and left St. Germain uncovered. A quick pass to the latter and Beaumont did not have a chance. Page counted his team's sole tally when he got through on a pass from Lafrance. St. Germain was in the penalty bench at the time. St. Germain put the game on ice for his team when he swept around the Montreal defense three minutes before the end and beat Beaumont from a very difficult angle.

It was St. Germain again who got the last one in almost an identical manner. He skated around the defense and with unerring accuracy placed the rubber in the far corner of the nets.

The line-up:

UNITED CHURCH SHOULD NOT ORDAIN WOMEN

(Continued from page one)

ing of human live to place man above themselves.

He emphasized the need of co-operation between man and woman. In New Zealand, where women have equal franchise, the highest form of civilization has been attained. Regarding the ministring of sacraments, the speaker stated that the work of the Church consisted in a series of ministries to the souls, but that women were already ministring to souls. "The glory of the Lord will never be revealed until all flesh can see it together" was the last forceful statement of this speaker.

R. N. Stewart was the first speaker for the negative. Men and women have great differentiation of capacities, being fitted for two entirely different spheres of life. He maintained that the place of women is in the home, fulfilling their prerogative [illegible] mothers of the race. The Bible never mentioned women's place as being anywhere but the home. In fact, the speaker quoted Paul as saying "Let your women keep silent in the church for it is not permitted of them to speak".

Women were also described as being unfit both physically and mentally for important positions in the church. Another statement was that the church is already too effeminate, that there are too many old women in the pulpit, and that any help from women should only be a supplementary nature. Apart from all these reasons, the present time is inopportune, as many problems of reorganizing are now necessary because of the union of three great churches.

The second speaker for the affirmative, J. C. Torrance, B.A. claimed that the present attitude of the church had been framed by men, mostly celibates, holding low opinion of women. He went on to state, "If the right of ordination is not granted to women it will mean that the sacred rights do not amount to much or that the church is putting a stamp of inferiority on women. Either of these are unworthy of the United Church" His opinion is that the only union to be of any value will be when members of different denominations testify freely to their true beliefs.

Errol Amaron then opposed the resolution. Referring to the statement of his opponents, Mr. Amaron stated that the arguments used had been purely theoretical, no practical proofs having been given. The speaker then dealt with woman's physical condition; their intitution, often leading to fatal mistakes; the decline of nation due to the breaking up of home life; the impossibility of keeping young women in the pulpit; all these being important reasons why women should not be ordained to the ministry of the United Church.

Mr. Manuel then spoke for a few minutes in rebuttal, stating that pride was the main reason for the refusal to ordain women. He contended that women have been helping with all their might, only to find the gates to greater progress barred to them.

McGILL DAILY is printed by the Herald Publishing Company Limited for the Students' Executive Council of McGill University, of which Gilbert H. Fletcher is the Secretary-treasurer, at the office, 323 Sherbrooke St. West.

EATON'S

Announcing the Initial Showing of

The New Eatonia SUITS FOR SPRING

Surpassing all previous efforts insofar as value and variety of cloth and color are concerned. See the display today whether you intend to purchase your spring suit now or not.

PRICE, $25.00— EXTRA TROUSERS, $7.50

CONCENTRATED effort and close co-operation throughout the entire process—from woollen mill to Store—have resulted in the production of really fine clothing for men and young men at the most popular prices—at a great deal less, in fact, than men have been accustomed to paying for clothes so well designed, so expertly tailored, so carefully selected and made from such fine woollens.

A feature of the Eatonia assortment is the great range of models for men of all tastes and all builds.

The new Spring models for young men—single and double-breasted—the favorite easy-fitting sac coats for men as well as these extra types—

SHORTS TALLS STOUTS SHORT-STOUTS

THE VARIETY OF CLOTHS

NAVY BLUE SERGE
The original EATONIA! A heavy wool Botany serge of fine smooth finish and great durability.

NEW TWISTS
A cloth that will be popular this year because of its smart appearance and its surprising durability. Greys, tans and mixtures.

PLAIN GREY SERGE
In Oxford grey and a lighter shade. A wool serge of fine finish that is ideal for dress or business.

SCOTCH TWEEDS
Fresh new colorings and designs in beautiful Scotch tweeds—so pleasing to look at, so comfortable to wear and so satisfactory in service.

FANCY WORSTEDS
One of the features of the Spring showing. Smooth worsted fabrics of fine finish in new grays and mixed colorings.

STRIPED WORSTEDS
Blue and black wool worsteds of superior quality and dressy appearance in single and grouped pin striping.

Collegiate
The new single-breasted coat — with either peak or notch lapel.

Blackstone
The easy-fitting yet smart coat for men of middle age.

Campus
The correct double-breasted model for young men.

Eaton's—Second Floor.
